Sympli announces new CEO

Sympli is pleased to announce the appointment of Philip Joyce as its new CEO, effective today.

Prior to joining Sympli, Philip was the General Manager of the Settlement and Collateral business at ASX Limited and has played a key role in driving Sympli's engagement with the banks.

Philip will take over from David Wills, who led the company since its inception in 2018. David will be taking on the role of Head of Corporate Development at InfoTrack, supporting their future growth globally.

Announcing Philip's appointment, Sympli Chair, Blair Beaton, said that Sympli is positioning itself to be ready for its next stage of growth.

"With the recent positive intergovernmental announcement on interoperability and the progress in connecting to the banks, Sympli is preparing to move into operational mode," Mr Beaton said.

"The decision to appoint Philip was a unanimous decision by the Board and both ASX and InfoTrack. He was chosen due to his deep experience in end-to-end business leadership across multiple disciplines including payments, operations and product management, as well as his close working relationship with Sympli."

Philip has held a number of senior leadership positions, including at Westpac, Citibank, and NSW Treasury which makes him well-suited for the role.

Reflecting on his appointment, Philip said that he's excited about being selected to lead the company as it moves to the next phase.

"Sympli is in a strong position with significant momentum as we get closer to delivering real benefits to the industry and consumers by reducing settlement risk and increasing efficiencies.

"David has done great work in laying the foundations and getting the company to where it is today. I hope to build on that success and I'm motivated to lead the company in its next phase as we move to become operational."

Mr Beaton added: "I would like to take this opportunity to thank David for his contributions including getting Sympli to soft launch in NSW, Victoria, Queensland, and South Australia, and establishing connection pathways with the major banks."
